

INDUSTRY 4.0:

Towards the *Digital Enterprise*

A talk with Prof. Dr. Dieter Wegener
Siemens Corporate Technology

Friday 25 October 2019, 10.45 a.m.

Worklife Innovation Hub of EON Reality
Via del Lavoro 47, Casalecchio di Reno, Bologna

The pervasive adoption of digital technologies inside manufacturing is changing the way goods are designed, produced and distributed as well as company business models. Industry 4.0 and the model of Digital Enterprise have a raising impact on company organization, production, processes, communication, relationship between customers and suppliers alongside every value chain.

The meeting is thus an opportunity to exchange practices and experiences between the Italian and German industry systems as well as talking about how data and intellectual property rights could be protected under this new development framework.

Guest of honor, Prof. Dr. Dieter Wegener, Head of External Cooperation at Siemens Corporate Technology and Member of Siemens Board. Additionally, Prof. Dr. Wegener is speaker at the “Circle of the Executives Industrie 4.0” for the *Zentralverband Elektrotechnik - und Elektronikindustrie e.V.* (the German Association of the Electro and Electronic Industry) and at the “Circle of the Consultants for technology” for VDE/DKE (the German Centre for Electrotechnical Standardization).

The meeting will be held in the *Worklife Innovation Hub* of EON Reality, company leader in the world for augmented and virtual reality.
